## Universal Noid Light Tool – L2780

### Introduction

This versatile tool tests throttle body injectors, ported fuel injectors and sequential central port injectors. One person operation.

### Instructions

- Attach tool to the car body or windscreen with the suction cup.
- View the Noid light from the front seat while cranking the engine.
- A flashing light indicates normal pulses.
- **No light or constant light indicates a problem.**
- Two probe adaptors can be screwed on to form larger diameter probes.
- Wind lead around handle for storage.

Variable width

Two sets of tips – different sizes
