Brake Bleeding Spanners - E12805

Introduction

These spanners are specially made for reaching into the bleed nipples on brake drums and disc callipers without having to first remove the wheel.

Each Spanner has the same sized opening at both ends in a single hex format to prevent the spanner slipping and rounding off the nipple.

The depth of offset is different at either end of the spanner to allow use without taking the wheel off the vehicle when being used on vehicles with wheel rims that would otherwise prevent an ordinary spanner from gaining access.

Applications

E12807	Spanner 7mm	BMW Fiat Ford Peugeot Renault VW Audi
E12808	Spanner 8mm	Citroen Fiat Ford Honda Mazda Peugeot Renault Toyota Volvo
E12809	Spanner 9mm	Citroen Ford Mercedes Opel Peugeot Renault
E12810	Spanner 10mm	Ford Datsun Honda Mitsubishi Peugeot Suzuki Toyota Volvo
E12811	Spanner 11mm	Ford Datsun Mitsubishi Renault Volvo
E12805	Set Of Five Brake Bleeding Spanners
