

J&S Technical Information

VW/Audi Belt Tensioning Spanner (Matra V.159)

- E13173** Belt Tensioning Spanner - Short
- E13174** Belt Tensioning Spanner - Long

These spanners are used to tension the cambelt when it has been replaced, and fit the vehicles indicated in the chart below.

The actual tension in the cambelt should be measured using a cambelt tension gauge which is available as a separate item (MOP370)

Two lengths are offered as some people find it easier with the longer spanner on some applications.

Year	Models	Engine Codes
1989-94	Golf/Vento 1.8/2.0 16V Scirocco 1.8 16V Passat 2.0 16V Corrado 1.8/1.8 G60/2.0 16V Audi 80 2.0 16V	4A 6A 9A KR PL PG ACE ABF
